Ekramul Islam

Software Develop for B2B | CEO @LynkSphere
Melbourne, Victoria, Australia

Summary

Co-Founder and CEO of LynkSphere, a Melbourne-based software company building iOS, Android, and web applications for businesses worldwide. I started the company to give clients across the globe access to high-quality, reliable software development, and have since led end-to-end delivery across mobile and web platforms. Alongside running LynkSphere, I am completing a Master of Data Science at Monash University, where my work spans machine learning, NLP, data visualisation, and bioinformatics. I hold a Bachelor of Computer Science (Data Science) from Monash, graduating on a High Achievers Scholarship. My work sits at the intersection of software engineering, data science, and computational biology. I am experienced in Python, R, Java, and cloud architecture, and I apply these across both client projects and academic research. Currently open to Data Scientist, Python Developer, and Bioinformatics roles in Melbourne.

Experience

LynkSphere
Co-Founder & CEO
November 2024 - Present (1 year 6 months)
Melbourne, VIC

Based in Melbourne, LynkSphere is a software company that embeds directly into client teams to design, build, and ship iOS, Android, and web applications. We plug in as a senior technical and product partner, working within the cadence of our clients' teams across mobile development, web platforms, AI and ML integration, and data solutions. As Co-Founder and CEO, I drive strategic direction, client relationships, and ensure every engagement is senior-led from start to finish.
